Professional Summary

Senior Full-Stack Developer and Systems Architect with 5+ years of experience building enterprise-grade platforms. Founder of **MGzon**, a comprehensive ERP ecosystem serving 10,000+ users across e-commerce, fintech, HR, and real estate sectors. Expert in Linux-based development, clean architecture, and scalable system design. Built production-ready fintech systems with PCI-DSS compliance, custom monitoring infrastructure, and automated reporting engines.

Technical Skills

Frontend

React.js, TypeScript, TailwindCSS, Next.js, PWA, Redux

Backend

Node.js, Express.js, NestJS, RESTful APIs, GraphQL, Microservices

Databases

PostgreSQL, MySQL, MongoDB, Redis, Prisma, Query Optimization

DevOps & Linux

Debian, Ubuntu, Kali, Bash, Docker, Nginx, CI/CD, Git

System Architecture

Microservices, Event-Driven, BullMQ, Batch Processing

Security & Fintech

PCI-DSS, JWT, OAuth2, Payment Gateways, Digital Wallets

Monitoring

Custom Health Monitoring, Logging, Alerting Infrastructure

Tools

Git, Postman, Vim, Jira, Agile/Scrum

Key Projects

MGzon – Enterprise ERP Platform

Founder & Lead Architect | 2022 – Present

- **Fintech Module:** Digital wallet system with transactions, reconciliation, PCI-DSS compliance
- **E-Commerce Engine:** Online store management with inventory, orders, multi-vendor
- **HR System:** Employee records, payroll, attendance, performance reviews
- **Inheritance System:** Automated legal distribution engine with Excel export
- **Webhook Dispatcher:** Event-driven third-party integrations
- **Health Monitoring:** Custom observability with real-time alerts

TypeScript | Node.js | React | PostgreSQL | Redis | Docker | Linux | BullMQ

Inheritance Distribution Engine

Independent Project | 2023

- Automatic share distribution under Islamic law with 100% accuracy
- Excel reports with full audit trails and legal documentation
- Admin dashboard for case management, handles edge cases

TypeScript | Node.js | React | ExcelJS

Custom Health Monitoring System

Architecture Design | 2024

- Real-time health checks with automatic recovery
- Centralized logging with search and filtering
- Automated alerts (Slack, Email, SMS) - 99.9% uptime

Node.js | Redis | Event-Driven | WebSockets

Key Achievements

- Batch processing: 100,000+ daily transactions
- 85% reduction in production incidents
- 60% cost savings vs Datadog
- 20+ hours/week saved via automated reporting
- 50,000+ daily webhook events processed
- 300% query performance improvement

Technical Philosophy

- **Linux-first:** Debian/Kali/Ubuntu, terminal-centric workflow
- **Clean architecture:** Separation of concerns, maintainability
- **Scalability:** Build for 10x growth without refactoring
- **Security first:** Implement at every layer

Professional Experience

Education & Certifications

Founder & Lead Developer

MGzon | 2022 – Present

- 0 to 10,000+ users across 5 countries
- 1M+ monthly requests microservices infrastructure
- Hired and mentored junior developers

Freelance Full-Stack Developer

2020 – 2022

- 15+ custom web applications across MENA region
- E-commerce platforms and business management systems
- Technical consulting and system architecture design

Self-Taught Developer

Continuous learning since 2020

- System Architecture & Design Patterns (Advanced)
- Linux Systems Administration (Expert)
- Meta Backend Developer Professional Certificate
- Linux Foundation Certified System Administrator (LFCS)

Languages

- **Arabic:** Native (C2)
- **English:** Professional Working Proficiency (C1)

Interests

- 🐧 Linux & Open Source Ecosystem
- 🏗️ System Architecture & Distributed Systems
- ⌨️ Terminal Automation & CLI Tools
- 💡 Built inheritance system to avoid Excel 😉

```
>_ MGzon CLI - Terminal Experience
npm install -g @mgzon/cli
```
