Professional Summary

Senior Full-Stack Developer and Systems Architect with 5+ years experience building enterprise-grade platforms. Founder of **MGzon**, a comprehensive ERP ecosystem serving 10,000+ users across e-commerce, fintech, HR, and real estate sectors. Expert in Linux-based development, clean architecture, and scalable system design. Built production-ready fintech systems with PCI-DSS compliance, custom monitoring infrastructure, and automated reporting engines.

Technical Skills

Frontend

React.js, TypeScript, TailwindCSS, Next.js, PWA, Redux

Backend

Node.js, Express.js, NestJS, GraphQL, Microservices

Databases

DevOps & Linux

PostgreSQL, MySQL, MongoDB, Redis, Prisma, Query Optimization

Debian, Ubuntu, Kali, Docker, Kubernetes, CI/CD, Git

System Architecture

Microservices, Event-Driven, BullMQ, Batch Processing

Security & Fintech

PCI-DSS, JWT, OAuth2, Payment Gateways, Digital Wallets

Key Projects

MGzon – Enterprise ERP Platform

Founder & Lead Architect | 2022 – Present

- **Fintech Module:** Digital wallet system with transactions, reconciliation, PCI-DSS compliance
- **E-Commerce Engine:** Online store management with inventory, orders, multi-vendor
- **HR System:** Employee records, payroll, attendance, performance reviews
- **Inheritance System:** Automated legal distribution engine with Excel export
- **Health Monitoring:** Custom observability with real-time alerts

TypeScript | Node.js | React | PostgreSQL | Redis | Docker

Inheritance Distribution Engine

Independent Project | 2023

- Automatic share distribution under Islamic law with 100% accuracy
- Excel reports with full audit trails
- Admin dashboard for case management

Key Achievements

- Batch processing: 100,000+ daily transactions
- 85% reduction in production incidents
- 60% cost savings vs Datadog

Technical Philosophy

- **Linux-first:** Debian/Kali/Ubuntu, terminal-centric
- **Clean architecture:** Separation of concerns, maintainability

- 300% query performance improvement
- **Scalability:** Build for 10x growth
- **Security first:** Implement at every layer

✨ Official CLI

Production Ready

>_ MGzon CLI

v1.0.0 · Latest

```
npm install -g @mgzon/cli
```
